Abstract

2
3 A messaging system allows people (senders) to send
4 message to others (recipients) whom they have seen, using
5 only a description of the recipient and information about
6 the time and place where they were seen. Typically, text
7 and/or multimedia messages will be sent from the senders
8 mobile telephone (3) to the mobile telephone of one or
9 more potential recipients (4) via a central message
10 pushing system (1) which identifies potential recipient
11 using a dynamically updatable database (2) of members
12 details.
